## EXPLANATORY NOTES

1. **Source of Data.** Statistics of exports are based upon the declarations of exporters (export entries) as subsequently checked by customs officials.

2. **Valuation.** The value of goods exported is the actual amount received by the exporter in Canadian dollars, excluding such charges as freight, insurance and handling. In effect, therefore, export values are taken f.o.b. point of shipment for export.

3. **Units of Quantity.** Weight, where shown, is the net weight of the goods, excluding the weight of such packing as is required for shipment. The expression "ton" means 2,000 pounds, and "cwt." 100 pounds, avoirdupois. Where other units of quantity are used, Imperial standards apply.

In this report are items such as "internal combustion engines and parts" which show a quantity in "number" as well as value. In these items the "number" refers only to the number of substantially complete articles exported, while the value includes also the value of any parts of the article exported. For such items the average value per unit cannot be ascertained.

4. **Coverage.** Statistics of "Exports of Canadian Produce" (also known as "Domestic Exports") include both goods wholly produced in Canada and goods previously included in statistics of imports which are changed in form by further processing in Canada and then exported. Statistics of "Exports of Foreign Produce" (also known as "Re-Exports") include only goods previously included in statistics of imports which are exported from Canada in the same condition as when imported. Minor operations such as sorting or re-packing are not considered as changing the condition of imported goods.

5. **Exclusions.** Export statistics exclude gold, but include gold products where the value of the gold content is less than 80% of the value of the article. A small amount of gold scrap in the form of jewellers' sweepings is also included. Other important exclusions are goods shipped to Canadian armed forces or diplomats stationed outside Canada, goods financed under the Defence Appropriation Acts and shipped to Canada's N.A.T.O. allies, temporary exports for exhibition or competition, and bunker supplies and ships' stores sold to foreign vessels in Canadian ports.

6. **Countries Credited.** Exports are credited to the country to which they are consigned at the time the goods leave Canada. The country of consignment is the country to which goods are intended to pass without interruption of transit, except in the course of transfer from one means of conveyance to another.

7. **Abbreviations.** The letters "N.O.P." mean "not otherwise provided for".

## NOTES EXPLICATIVES

1. **Source des données.** La statistique des exportations est fondée sur les déclarations des exportateurs (documents d'exportation) subséquemment vérifiées par les fonctionnaires des douanes.

2. **Évaluation.** La valeur des marchandises exportées est le montant réel, en dollars canadiens, reçu par l'exportateur, à l'exclusion des frais de transport, de l'assurance et des frais de manutention. En conséquence, la valeur des exportations est établie f.à.b., point d'expédition.

3. **Unités de quantité.** Le poids, là où il est donné, est le poids net des marchandises, à l'exclusion de celui de l'emballage nécessaire par l'expédition. L'expression "ton" veut dire 2,000 livres, et "cwt." 100 livres avoirdupois. Là où d'autres unités de quantité sont employées, les étalons impériaux s'appliquent.

Le présent rapport contient des articles tels que "moteurs à combustion interne et pièces", dont la quantité est indiquée par un "nombre" aussi bien que par la valeur. A cet égard, le "nombre" ne désigne que le nombre des articles à peu près complets exportés, tandis que la valeur comprend aussi celle des pièces de l'article exporté. Dans ces cas, il est impossible d'établir la valeur moyenne par unité.

4. **Champ d'application.** La statistique des "Exportations de produits canadiens" (appelées aussi "Exportations domestiques") comprend les marchandises entièrement produites ou fabriquées au Canada de même que les marchandises qui figuraient autrefois aux importations et dont la forme a changé par la fabrication au Canada et qui sont ensuite exportées. La statistique des "Exportations de produits étrangers" (appelées aussi "Réexportations") ne comprend que les marchandises qui figuraient autrefois dans la statistique des importations et qui sont exportées du Canada dans l'état où elles étaient lors de leur importation. Les manipulations secondaires telles que le triage et le réemballage ne modifient pas l'état des marchandises importées.

5. **Exclusions.** La statistique des exportations ne comprend pas l'or, mais elle comprend les articles en or dont la valeur de la teneur en or est de moins de 80 p.100 de la valeur de l'article. Elle comprend aussi une petite quantité de déchets sous la forme de "balayures de bijoutier". Les autres exclusions importantes sont les marchandises expédiées aux forces armées ou aux diplomates du Canada à l'étranger, les marchandises financées subordonnement aux lois sur les crédits de la défense et expédiées aux alliés du Canada de l'OTAN, les exportations temporaires pour expositions et concours, les approvisionnements de soutes et de navires vendus aux vaisseaux étrangers mouillés dans les ports canadiens.

6. **Pays de destination.** Les exportations sont attribuées aux pays auxquels elles sont expédiées au moment où elles quittent le Canada. Le pays de destination est le pays vers lequel les marchandises sont acheminées sans interruption de transport, sauf dans le cas d'un transbordement de moyen de transport à un autre.

7. **Abréviations.** Les lettres "n.d.a." signifient "non dénommé ailleurs".

## EXPLANATORY NOTES

**1. Source of Data.** Statistics of exports are based upon the declarations of exporters (export entries) as subsequently checked by customs officials.

**2. Valuation.** The value of goods exported is the actual amount received by the exporter in Canadian dollars, excluding such charges as freight, insurance and handling. In effect, therefore, export values are taken f.o.b. point of shipment for export.

**3. Units of Quantity.** Weight, where shown, is the net weight of the goods, excluding the weight of such packing as is required for shipment. The expression "ton" means 2,000 pounds, and "cwt." 100 pounds, avoirdupois. Where other units of quantity are used, Imperial standards apply.

In this report are items such as "lawn mowers, power and parts" which show a quantity in "number" as well as value. In these items the "number" refers only to the number of substantially complete articles exported, while the value includes also the value of any parts of the article exported. For such items the average value per unit cannot be ascertained.

**4. Coverage.** Statistics of "Exports of Canadian Produce" (also known as "Domestic Exports") include both goods wholly produced in Canada and goods previously included in statistics of imports which are changed in form by further processing in Canada and then exported. Statistics of "Exports of Foreign Produce" (also known as "Re-Exports") include only goods previously included in statistics of imports which are exported from Canada in the same condition as when imported. Minor operations such as sorting or re-packing are not considered as changing the condition of imported goods.

**5. Exclusions.** Export statistics exclude gold, but include gold products where the value of the gold content is less than 80% of the value of the article. A small amount of gold scrap in the form of jewellers' sweepings is also included. Other important exclusions are goods shipped to Canadian armed forces or diplomats stationed outside Canada, goods financed under the Defence Appropriation Acts and shipped to Canada's N.A.T.O. allies, temporary exports for exhibition or competition, and bunker supplies and ships' stores sold to foreign vessels in Canadian ports.

**6. Countries Credited.** Exports are credited to the country to which they are consigned at the time the goods leave Canada. The country of consignment is the country to which goods are intended to pass without interruption of transit, except in the course of transfer from one means of conveyance to another.

**7. Abbreviations.** The letters "N.O.P." mean "not otherwise provided for".

## NOTES EXPLICATIVES

**1. Source des données.** La statistique des exportations est fondée sur les déclarations des exportateurs (documents d'exportation) subséquemment vérifiées par les fonctionnaires des douanes.

**2. Évaluation.** La valeur des marchandises exportées est le montant réel, en dollars canadiens, reçu par l'exportateur, à l'exclusion des frais de transport, de l'assurance et des frais de manutention. En conséquence, la valeur des exportations est établie f.à.b., point d'expédition.

**3. Unités de quantité.** Le poids, là où il est donné, est le poids net des marchandises, à l'exclusion de celui de l'emballage nécessaire par l'expédition. L'expression "ton" veut dire 2,000 livres, et "cwt." 100 livres avoirdupois. Là où d'autres unités de quantité sont employées, les étalons impériaux s'appliquent.

Le présent rapport contient des articles tels que "tondeuses de gazon à moteur, et leur pièces" dont la quantité est indiquée par un "nombre" aussi bien que par la valeur. À cet égard, le "nombre" ne désigne que le nombre des articles à peu près complets exportés, tandis que la valeur comprend aussi celle des pièces de l'article exporté. Dans ces cas, il est impossible d'établir la valeur moyenne par unité.

**4. Champ d'application.** La statistique des "Exportations de produits canadiens" (appelées aussi "Exportations domestiques") comprend les marchandises entièrement produites ou fabriquées au Canada de même que les marchandises qui figuraient autrefois aux importations et dont la forme a changé par la fabrication au Canada et qui sont ensuite exportées. La statistique des "Exportations de produits étrangers" (appelées aussi "Réexportations") ne comprend que les marchandises qui figuraient autrefois dans la statistique des importations et qui sont exportées du Canada dans l'état où elles étaient lors de leur importation. Les manipulations secondaires telles que le triage et le réemballage ne modifient pas l'état des marchandises importées.

**5. Exclusions.** La statistique des exportations ne comprend pas l'or, mais elle comprend les articles en or dont la valeur de la teneur en or est de moins de 80 p. 100 de la valeur de l'article. Elle comprend aussi une petite quantité de déchets sous la forme de "balayures de bijoutier". Les autres exclusions importantes sont les marchandises expédiées aux forces armées ou aux diplomates du Canada à l'étranger, les marchandises financées subordonnellement aux lois sur les crédits de la défense et expédiées aux alliés du Canada de l'OTAN, les exportations temporaires pour expositions et concours, les approvisionnements de soutes et de navires vendus aux vaisseaux étrangers mouillés dans les ports canadiens.

**6. Pays de destination.** Les exportations sont attribuées aux pays auxquels elles sont expédiées au moment où elles quittent le Canada. Le pays de destination est le pays vers lequel les marchandises sont acheminées sans interruption de transport, sauf dans le cas d'un transbordement de moyen de transport à un autre.

**7. Abréviations.** Les lettres "n.d.a." signifient "non dénommé ailleurs".

<sup>1</sup> Most exports of platinum metals to the United States have been previously refined in the United Kingdom from Canadian ores and concentrates. Starting with January 1959 statistics, such exports are recorded as foreign rather than domestic produce. In this volume, statistics for 1958 are adjusted accordingly. While no exact adjustment for earlier years is possible, substantially correct figures can be obtained by transferring from domestic to foreign produce the value of platinum metals exported to the United States. — La plupart des platinites exportés aux États-Unis étaient autrefois affinés au Royaume-Uni à partir de minerais et concentrés canadiens. Depuis janvier 1959, ces exportations s'inscrivent plutôt comme produits étrangers que canadiens. Dans le présent volume, les chiffres de 1958 ont été rectifiés en conséquence. Bien qu'aucune rectification précise ne soit possible quant aux années antérieures, on peut obtenir des chiffres assez exacts en transportant des produits canadiens aux produits étrangers la valeur des platinites exportés aux États-Unis.
